

Detects IgG and IgM after
 - Infection with SARS-CoV-2
 (Protein “N”)
 - After immunization with all
 current vaccines (Protein “S”)

BioHit SARS-CoV-2 IgM/IgG Antibody Test Kit (immunogold)

- **Ensured Quality**
 - CE-IVD certified
 - FDA-EUA certified
 - BioHit is an ISO 13485 certified manufacturer (TÜV Süd)
 - Multiple published evaluations available (Yale University, US Dept. of Health)
- **Best in Class Performance – detects response to vaccine and all viral strains**
 - Clinical Sensitivity: wild type > 99.08 %, vaccine 100%
 - Clinical Specificity: wild type > 99.12 %, vaccine 100%
- **Dual Assay, two results: one for IgG and one for IgM**
 - The IgM test result indicates recent infection
 - Presence of IgM and IgG indicate a recent infection which has been overcome
 - IgG only, indicates an infection in the past
- **Built in Quality Control**
 - Each test has a built-in positive control which indicated if the test has worked
- **Ease of Use**
 - Minimal sample volume one drop of capillary blood
 - Test can be performed healthcare professionals or trained staff
- **We have already sold over 1 million assays in 20 nations: USA, UK, Germany, France ...**
